

Robotic Process Automation

Improve Processing Accuracy and Speed

WHAT IS RPA

Robotic Process Automation is software that allows employees to automate business processes by configuring “bots” to capture, interpret and manipulate applications via their GUI.

Analysts have forecasted RPA to grow at a 60.5% CAGR from 2014 to 2020.

LACK OF AUTOMATION

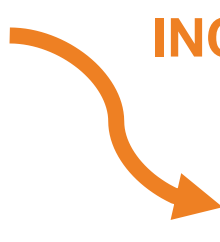

80%

Of employee hours are spent on repetitive and unfulfilling tasks...

ERRORS
DATA INACCURACY
